Dear members of the ACC,

I have been a TEP customer for over 20 years. The energy efficiency program has been a huge benefit to many of the individuals in my neighborhood. We appreciate this program and recognize the wonderful value that it provides to TEP customers. I would like to see energy efficiency initiatives expanded and certainly not curtailed. Yesterday I heard on the radio that there was consideration that the energy efficiency program might be reduced or even eliminated. We value this program here in Tucson. The strong energy efficiency emphasis enhances the local reputation of TEP. The radio report noted it was one of the best in the nation. Please do not reduce or eliminate this energy efficiency program.

Sincerely,  
Martha McKibben, Tucson
